Justification												
For projected numbers.												
Student population in our area is not expected to change. CTE enrollment is expected to remain constant. The increase in articulation credit is based upon the following factors:												
The baseline of the last 3 years is the mean of a strong growth era. The projected numbers are based upon this year's articulation credit awarded and the enrollment reported by the CTE directors.												
Real growth is expected in computer hardware and software areas, because of an additional CIW program in our area, and anticipated enrollment in those programs.												
A small increase in drafting is anticipated due to a new program beginning at one of our larger schools.												
New methods of identifying eligible students may also increase our numbers, as will new reporting procedures planned for the TTC.												
A decrease in enrollment for the active agreement in OSA from Polk County is due to a very large, one year bump in enrollment, which skewed the baseline. The CTE director for Polk County does not anticipate another large enrollme
