

CSCC Library Presents  
**Studio Connect**

**Thank You** for your interest in Studio Connect. We are excited to introduce you to this collaborative learning environment located in the library at Cleveland State Community College. This creative, interactive space has been designed to support project development, and it contains technology that expands the way students work on assignments. The space is designed to evolve, incorporating new technology as it becomes available. As the world outside continues to grow and change, so will Studio Connect!

Studio Connect is funded in part by a Title III Grant awarded to Cleveland State. A major goal of the grant is to increase student engagement across campus, specifically outside of the classroom. This multifaceted grant also includes the ePortfolio initiative, which allows students to create their own electronic portfolio in order to collate and display their achievements from their Cleveland State experience. Students are able to use Studio Connect to create unique digital artifacts to include in their ePortfolios, such as a **video, photo collage or multimedia presentation.**

**studio**  
**connect** • create and collaborate

**Studio Connect** offers an array of high tech tools to help students create and collaborate.

Innovate

Collaborate

Create

In Studio Connect, students can gain experience using emerging technologies, providing an opportunity to increase problem solving and critical thinking skills. It gives them a place outside of class to gather together with their fellow students to prepare for assignments and explore new trends. They will have the opportunity to enter the workforce highlighting their skills and experience.

**30 iPads**, which come preloaded with an assortment of educational apps to help students succeed, are available for students to use in the library. Android

tablets and laptop computers are also available. Other highlights include a **Promethean Board**, which allows students to simulate a classroom presentation environment, an **Apple TV system**, which students can use to project their iPads onto a large screen monitor, and **2 iMac computers** that are loaded with powerful software such as Adobe Creative Suite, iWork, iMovie, GarageBand, and Camtasia. Studio Connect provides an interactive environment where students can work together on cutting-edge projects, such as web design, video creation, or putting together an **ePortfolio**.
