Logistics & Supply Chain Management
program

Graduates in Logistics & Supply Chain Management are in high demand! Start your new career today!

The Logistics and Supply Chain Management Concentration of the Associate of Applied Science Degree in Business provides students with the skills needed for jobs in high-demand supply chain and logistic careers. Students will learn the principles of logistics necessary for employment and advancement in the field with courses emphasizing:

- Logistics and supply chain management functions and activities
- Data analytical tools used in supply chain management
- Ethical/legal issues related to purchasing and transportation of goods and materials
- Critical thinking skills
- Marketing, management, and customer service strategies
- Sourcing and procurement processes and bottom line impact to businesses
- Current local, state, federal, and international laws and regulations related to the large-scale transport and storage of materials.

Students will also participate in an intense logistics capstone strategy course and an internship experience in the final semester of the program.

Program Features:
- Classes will be offered in an accelerated block scheduling format.
- Classes offered in two formats meeting either virtually one night per week or online.
- Students only focus on three courses at a time.
- Students can elect to take gen ed classes in the summer if they prefer to reduce their fall and spring semester course loads.
- This degree program is eligible for financial aid.

Advantages:
- You will be in class with "like-minded" people who are self-disciplined and focused on completing their degree.
- Interaction with other students provides networking opportunities to form strong connections with other professionals.
- Working toward your degree as a group has been proven to dramatically improve graduation rates.
- Faculty who teach in this cohort program understand the demands working students face and are committed to helping students achieve their individual goals.
- Earning your business degree can open doors for promotion in your career.
